**OTHER Y'S TO VISIT DURING THIS TIME.**

# Annual Facility Improvement Plan

| Task                          | Description   |
|-------------------------------|---|
| Duct Sanitizing               | Reduces allergens, prevents mold growth, improves air flow and overall indoor environment. This cannot be done while the building is utilized.  |
| Touch-Up Painting             | Miscellaneous touch-up painting will be done throughout the building.   |
| Carpet Cleaning               | Carpets are cleaned on a regular basis, but DEEP CLEANING occurs during the shutdown.   |
| Polish Gym Floor              | Refinish and polyurethane entire gymnasium floor, restoring floor's protective coating and enhancing its durability.  |
| Clean Backwash Filters        | Cleaning the backwash tanks is crucial for maintaining optimal water quality by removing debris, dirt, and contaminants in the filter.  |
| Acid Wash Pool Deck Tiles     | This process removes stubborn stains and mildew while sanitizing the surface and removing harmful bacteria. Washing also helps to maintain the integrity and lifespan of the tiles.   |
| Diamond Brite Resurfacing     | Out with the old plaster and in with a new Diamond Brite surface. Diamond Brite is a high-quality, durable aggregate finish that resists staining, etching, discoloration, and offers a non-slip texture. The pool will sparkle like new with a bright and shiny new surface! |
| Program Room on Second Floor  | Converting this room to a new state-of-the-art STEM/ESPORTS Lab.  |
| Scribner Room on Second Floor | Converting this room to a new multi-purpose yoga and event space.   |

## Local Y's that participate in Nationwide Membership

All annual members (paying monthly or in full) may visit other Y's during our closure. Note: Triple Play (3 Month) members are not included.

### Madison Area Y
